

## CEHST Environmental Consultants – CoE spin-off Firm

### What is a spin-off firm creation by CoE?

A spin-off firm established by the Center of Excellence (CoE) on Environmental Health and Toxicology (EHT) aims at putting the results of their research to commercial value, and have a market medium for technology transfer and commercialization. As an initial investment, spin-offs get intellectual property and limited financial contributions, with the prospect of rapid growth, according to the proposed business plan. As a rule, spin-offs continue to sustain links with their parent organization (CoE), and can serve as an important mediator and facilitator of knowledge and technology transfer from the funded CoE.

This spin-off firm namely CEHST is a science-based environmental consulting firm established to provide environmental science, toxicology and human health consulting services to the public and private sectors. We pride ourselves on providing highly technical and highly responsive professionals to evaluate and develop solutions to a wide variety of human health and environmental restoration. CEHST specializes in the specific scientific expertise of health, toxicology, environmental assessment, and restoration of contaminated areas.

### Mission Statement

Our mission is to develop sound scientific solutions to issues in toxicology, environmental science and health, and environmental restoration by bioremediation and phytoremediation by applying state-of-the-art science to problems faced by private industry, government, and the general public. Our business will be conducted in a manner that is productive and cost-effective for our clients and will include a work environment that fosters scientific and professional excellence.

### CEHST

In conclusion, we proposed the new and challenging environmental consulting firm which is a state of the art science-based to solve environmental problems raised up by our clients. This startups will need an initial funding from the CoE but will survive in the long run with the best practice and the best knowledge we have from our faculty members we have from all of the consortium institutions.

CEHST (Center of Environmental Health, Science and Toxicology) will serve as a forefront of CoE to provide service to the needed clients with dignity and state of the art scientific base. We are specialized mainly in Environmental Science, Health and Toxicology and Bioremediation of both organic and inorganic contaminated areas. We also provide knowledge and technical solution for resource recovery.

At CEHST, we provide clear sustainable solutions that improve the quality of life. We ensure safety and sustainability in our project operation.
